ALUTECH

PROJECT | ALUTECH
CUSTOMER | Alutech
LOCATION | Belarus

Alutech Incorporated manufactures aluminum products and components. The design and preparation of the project required Lindab-Astron engineers to work with the Belarus Authorities in order to obtain Belarus Technical Approval. Many adaptations of Astron's design concept were made to conform to specific local norms and construction practices. The 17,000m² project, equipped with cranes, subsequently was completed after 8 months erection time. The customer was highly pleased with the result!

Office

LIBERTY INVEST

PROJECT | IPES N.V.
CUSTOMER | Liberty Invest
LOCATION | Belgium

This dramatic office building is the first 6-storey steel building from Lindab-Astron in Belgium. Thierry Storme, director of Ipes n.v., said "Whether to build in steel or concrete is no longer really a question. Today, more and more architects use a combination of the two materials. Flexible solutions, solid structural design combined with aesthetics, competitive pricing; Lindab-Astron has adapted its systems well to the new market requirements. Floors are set back from one another which, combined with the intensive use of glass and aluminium, plus the rotunda with its granite cladding, serve to give the Liberty building a modern and contemporary look."

Office

NOVASEP HOLDING

PROJECT | NANCY CONSTRUCTION SA
CUSTOMER | Novasep Holding
LOCATION | France

NOVASEP HOLDING

PROJECT | NANCY CONSTRUCTION SA
CUSTOMER | Novasep Holding
LOCATION | France

Novasep already ordered a 2,900m² three floor headquarters Astron building with a 1,400m² production area in 2002 (see precedent project). This time, the company needed a new building for its holding which is located on the same site in Pompey (F). Since the customer was very satisfied with execution and services for the previous buildings, there was no doubt to turn to Nancy Construction again, to architect Claude Schlegel and the Astron building system.

S.C.I CONSTELLATION

PROJECT	EIFFAGE CONSTRUCTION STRASBOURG
CUSTOMER	S.C.I Constellation
LOCATION	France

Eiffage Construction Strasbourg completed nine Astron buildings in a business park in a key area close to Strasbourg (France). The office part is MSB, while the production and storage area is a 1,600m² SSB dedicated to the packaging of teas and tea plants for the company Herbapac. This is an ultra-modern plant planned for a capacity of 300 tons per year, with four production lines.

Commerce

DUPONT EST S.A.S.

PROJECT	NANCY CONSTRUCTION SA
CUSTOMER	Dupont Est S.A.S.
LOCATION	France

Dupont Est wanted to make for its bathrooms showroom of 1,200m² a real showcase for the company image and wanted a showroom facility that could operate at high efficiency and, therefore, among other features, insisted upon maximum flexibility in the internal layouts. With its curved entrance area with arched beams the building itself really promotes the company's business.

UNIVERSITY OF EAST LONDON

PROJECT	MITCHELL DESIGN & CONSTRUCTION LTD
CUSTOMER	University of East London
LOCATION	United Kingdom

Delivery of a new academic faculty building at the University of East London campus. Generous window sections in combination with four distinguishing roof lanterns mark the Lindab and Mitchell solution that was finally chosen. Before that, the plan was to build a traditional building on the site, but since the budget could not stretch that far, Mitchell suggested the Astron building system. The end result was a 6,000m² steel building delivery. On time, on budget and very much "on" for both students and teachers.

Astron is the brand name of the products sold by the Building Systems Business area of the Lindab group, Europe's largest manufacturer of steel building systems for industrial, office and commercial use.

Lindab-Astron produce up to 1,000 buildings a year, distributed either through a network of nearly 400 certified independent Builders, spanning nearly 40 countries or through our Key Accounts Unit. Our headquarters is located in Diekirch (Luxembourg). Lindab's concept is clear and simple:

We simplify construction
