Lindab Astron POLAR SINUTHERM Wall systems

Polar – Sinutherm Wall systems

# Polar wall system

The Polar wall is a complete wall system based on sandwich panels. It includes all necessary framed openings, fasteners and finishing flashings.

Different insulation thicknesses and panel profiles are available within the Polar wall system. They consist of two profiled ribbed coated steel panels, produced by cold roll forming, between which a CFC free polyurethane foam is factory injected. Tongue and groove jointing arrangement ensure watertightness.

## **TECHNICAL SPECIFICATIONS:**

Panel thickness: up to 80mm

Cover width: 1,000mm

The U-values of the different products are those published by

the panel manufacturers.

#### FIXING:

Polar panels are fixed vertically to the secondary framing by special screws, complete with colour matching composite nylon heads or, as an option, with hidden fasteners.

## COLOURS AND COATINGS:

The Polar wall systems offer different coatings satisfying the various dimatic requirements.

Exterior coatings and colours are those published by the panel manufacturer.

Interior coatings: Superpolyester in grey white

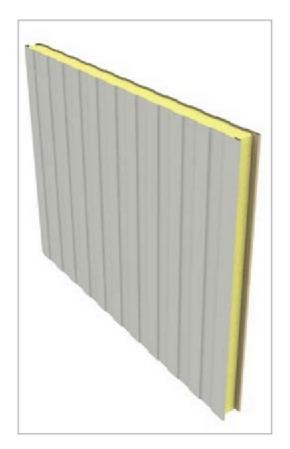

## ACCESSORIES:

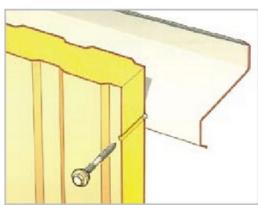

A range of fully compatible accessories is available for each of the Polar wall systems. They ensure complete watertightness and pleasing aesthetics:

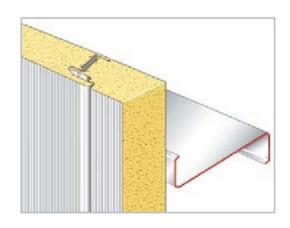

- · Single or double personnel doors
- · Truck doors
- · Window frames
- Framed openings
- · Wall louvres
- · Flashings and trims

# ADVANTAGES:

- · High degree of thermal insulation
- · Aesthetical exterior and interior finishes
- · Easy maintenance
- · Quick erection
- · Large range of integrated accessories

# Sinutherm wall system

The Sinutherm wall is a complete wall system based on sandwich panels with sinusoidal corrugation on the exterior panel and a slightly ribbed interior surface.

Consisting of two coated steel panels, produced by cold roll forming, between which a CFC-free polyurethane foam is factory injected. Sinutherm panels are produced from steel, which is protected by a GALFAN coat on both sides and have a superpolyester or PVDF exterior coating.

# **TECHNICAL SPECIFICATIONS:**

The vertical panel-to-panel joints are coated aluminium transition channels.

- · Total panel thickness: 84mm
- Cover width: 1,000mm (8 modules of 125mm)
- Fire rating: B-s3, d0 according to EN 13501-1
- U-value: 0.34W/(m<sup>2</sup>\*K)

#### FIXING:

The panels are fixed horizontally to sub-girts by means of selftapping screws, which are hidden in the longitudinal overlaps. These overlaps have a factory applied watertight tape sealant.

#### **COLOURS AND COATINGS:**

The Sinutherm wall system offers different coatings satisfying the various climatic requirements

Exterior coatings: 25 micron:

- · superpolyester in colour 21
- PVDF in colour 21 or 29

Interior coatings: light grey primer

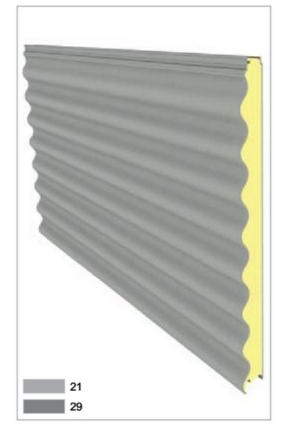

# ACCESSORIES:

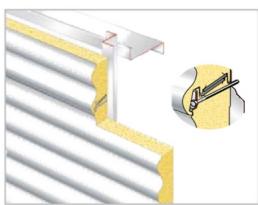

A range of fully compatible accessories is available for the Sinutherm wall system. They ensure complete watertightness and pleasing aesthetics:

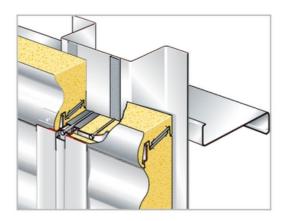

- · Single or double personnel doors
- · Truck doors
- Window frames
- · Framed openings
- Wall louvres
- · Flashings and trims

# ADVANTAGES:

- Architecturally pleasing, horizontally installed sandwich panel
- · Hidden fixations
- · High performance insulation
- · Quick erection
- · All flashings and connecting parts

# www.astron.biz

Astron is the brand name of the products sold by the Building Systems Business area of the Lindab group, Europe's largest manufacturer of steel building systems for industrial, office and commercial use.

Lindab-Astron produce up to 1,000 buildings a year, distributed either through a network of 400 certified independent Builders, spanning nearly 40 countries or through our Key Accounts Unit. Our headquarters is located in Diekirch (Luxembourg). Lindab's concept is clear and simple:

# We simplify construction
